

**MEMORANDUM – ACLUP COMPATIBILITY REVIEW**

**ALUC\_2018-0007  
OCTOBER 18, 2018**

**APPLICANT/OWNER:** YULUPA INVESTMENTS LLC  
P O BOX 630  
UKIAH CA 95482

**AGENT:** REBECCA DALSKÉ  
LACO ASSOCIATES  
776 SOUTH STATE STREET SUITE 102A  
UKIAH CA 95482

**REQUEST:** Mendocino County Airport Comprehensive Land Use Plan Consistency Determination to institute a Rezoning and General Plan Amendment from Agricultural (AG40) Zoning and Agricultural (AG40) General Plan designations to Industrial (I-2) Zoning and Industrial (I) General Plan designations

**AIRPORT ZONE:** B2

**LOCATION:** 3± miles south of Ukiah’s town center and on the east side of Taylor Dr. (CR 143) and more specifically 0.2 miles south of its intersection with Plant Rd. (CR 142), located at 3201 Taylor Dr., Ukiah (APN: 184-140-10).

**PROJECT DESCRIPTION:** The applicant proposes to change the site’s current land use and zoning designations of the existing ten acre parcel from Agricultural (AG40) to General Industrial (I-2) in order to facilitate the relocation of existing uses located on a parcel north of the proposed location in order to incorporate compatible land uses on this and adjacent parcels. The subject parcel would be developed with wood and green waste chipping and grinding, concrete grinding and construction demolition and inert debris storage. Future development plans include the pouring of a concrete pad and the construction of a clear span structure.

**ACLUP CONSISTENCY REVIEW:** The Compatibility Guidelines for Specific Land Uses (Appendix D of the Airport Comprehensive Land Use Plan “ACLUP”) in Airport Zone B2 lists warehouses and distribution facilities as “potentially compatible with restrictions.”

Compatibility Criteria Table 2A of the ACLUP (page 2-6, attached) broadly identifies low-intensity manufacturing as a normally acceptable use in the B2 Airport Zone. These uses can typically be designed to meet the density requirements and other development conditions listed in Table 2A.

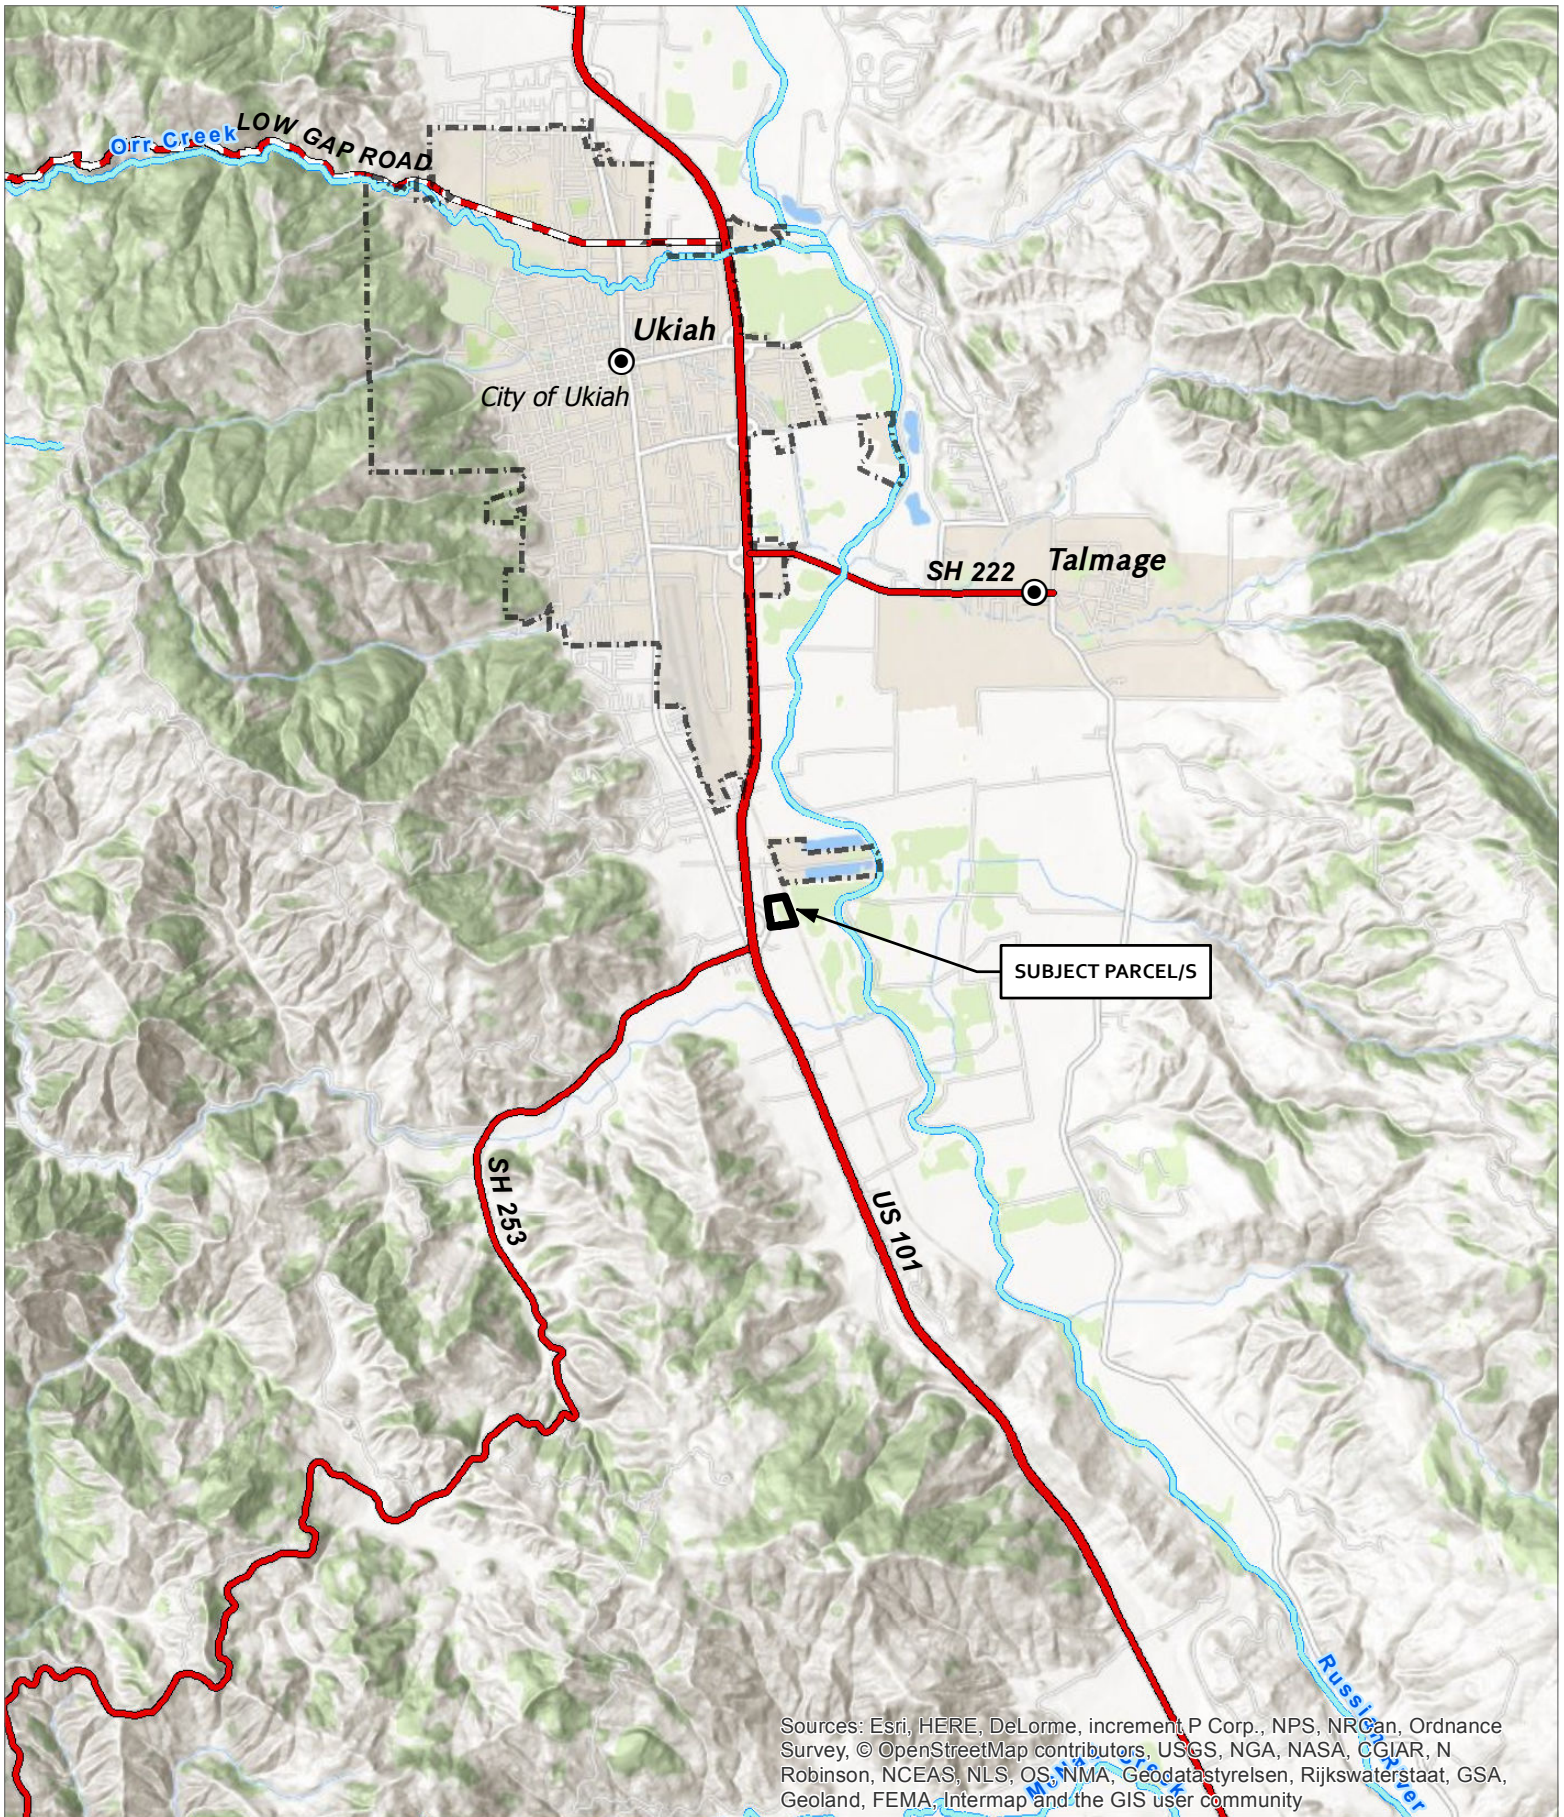

Zone B2 limits density at the project site to less than 90 persons per acre at any given time. Per the applicant, the proposed project of chipping, grinding and debris storage would not begin to approach these density limitations.

**STAFF RECOMMENDATION**

Given that the proposed project associated with this compatibility review is linked to similar adjacent solid waste uses on properties also owned by the applicant/owner, and would result in a more centralized facility, which would reduce drive times, transport of waste and result in the reduced emission of potential greenhouse gasses, and that adjacent parcels also are within the Industrial (I-2) Zoning District and the Industrial (I) General Plan Designation, approval of this compatibility review is recommended.

## Compatibility Guidelines for Specific Land Uses

The compatibility evaluations listed below for specific types of land uses can be used by local jurisdictions as guidelines in implementation of the general compatibility criteria listed in Table 2A. These evaluations are not regarded as adopted policies or criteria of the Mendocino County Airport Land Use Commission. In case of any conflicts between these evaluations of specific land uses and the policies and criteria in Chapter 2 of this document, the contents of Chapter 2 shall prevail.

Land Use	Compatibility Zones			
	A	B1/B2	C	D

**Table 2A Continued**  
**Compatibility Criteria**  
**Mendocino County Airport Land Use Commission**

---

**NOTES**

- 1 Residential parcels should not be smaller than the indicated size nor have more than the indicated number of units per acre. Maximum densities expressed in acres are gross acres; those expressed in units per acre are net acres.
- 2 The land use should not attract more than the indicated number of people per acre at any time. This figure should include all individuals who may be on the property (e.g., employees, customers/visitors, etc.). These densities are intended as general planning guidelines to aid in determining the acceptability of proposed land uses. Special short-term events related to aviation (e.g., air shows), as well as non-aviation special events, are exempt from the maximum density criteria.
- 3 Open land requirements are intended to be applied with respect to the entire zone. This is typically accomplished as part of the community's master plan or a specific plan.
- 4 These uses typically can be designed to meet the density requirements and other development conditions listed.
- 5 These uses typically do not meet the density and other development conditions listed. They should be allowed only if a major community objective is served by their location in this zone and no feasible alternative location exists.
- 6 See Policy Section 3.3.
- 7 May be modified by airport-specific policies.
- 8 In those portions of the B Zones located lateral to the runway, no restrictions on the storage of flammables apply. Within the balance of the B1 and B2 Zones, up to 2,000 gallons of fuel or flammables is allowed per parcel. More than 2,000 gallons of fuel or flammables per parcel within the balance of the B1 and B2 Zones requires the review and approval by the ALUC. See Appendix G for a diagram of typical area lateral to the runway.
- 9 Refer to Policy 3.2.3. for definitions which distinguish between hospitals and medical clinics.
