Dear Committee Board Members

I want to express my concerns about the solar panels proposed for Pine Street. Solar panels on ground level take away from the historical beauty of the gardens. We do not want to set a precedence that will have more residence doing this as it will distract from the historic setting that Mendocino is known for.

I understand solar panels have less impact on the environment. Anywhere else they would be acceptable. Here, we need to keep the history preserved-that is what makes us unique and attractive. Please reconsider the impact you are proposing that would change this village. Let's retain the charm and beauty that makes Mendocino so very unique and a pleasure to everyone's eyes.

Thank you,
June C Scofield, DC
