

# THEN & NOW

Looking at photographs is a good way to learn about history. By comparing photographs from a different time to life today we can see how life has changed.

## THEN

In these photographs of Mendocino County schools you may notice objects, buildings and even people look different than they do today.

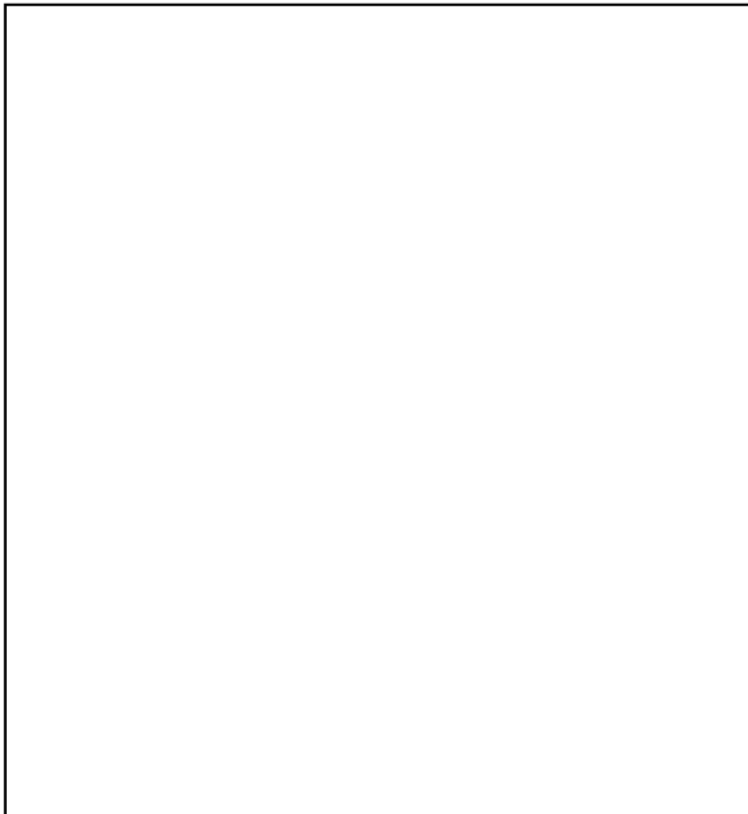

Kids arriving at school on an donkey.

4th Grade Students seated in their classroom.

Students outside their school house with the teacher.

## NOW

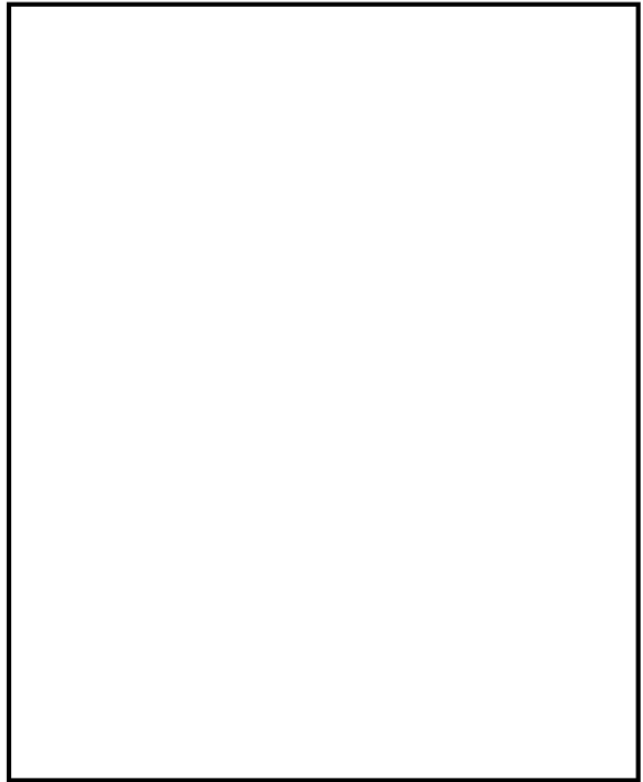

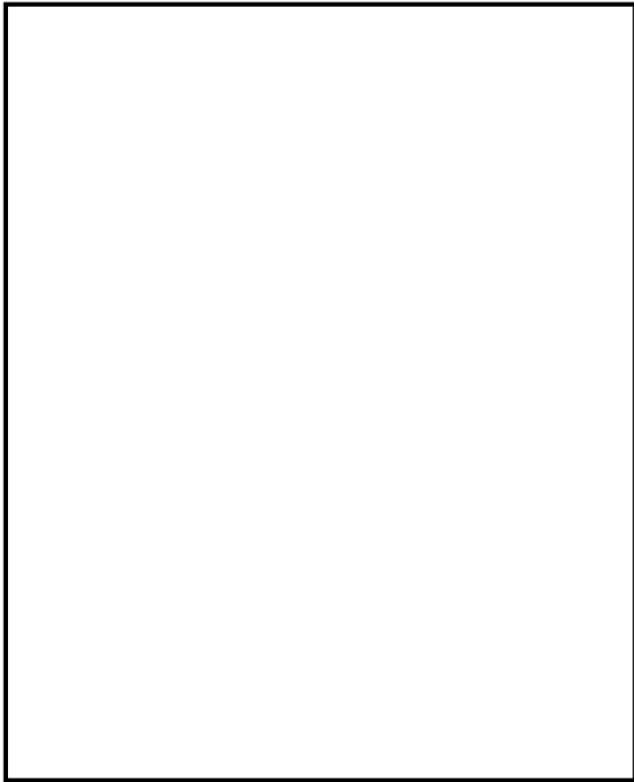

Your turn! Draw a picture showing how you get to school or of your school or classroom.

# WHAT DO YOU SEE?

Use the space below to describe what you can see in the photos and then describe what school is like today.

**THEN**

**NOW**

---

Do you notice anything that is the same about school from then and school now?

What are the differences you noticed about school today and school in the past?

Why do you think these changes happened?
