100 Feet of Defensible Space

In January 2006 new state law (PRC 4291) expanded defensible space clearance around homes and structures from 30 feet to 100 feet. Proper clearance to 100 feet increases the chance of your house surviving an uncontrolled wildfire. Please visit the CAL FIRE web link <http://www.fire.ca.gov> or contact the Mendocino Unit Headquarters for additional information:

Tree Removal Requirements

California Forest Practice Regulations may apply to your project if you are permanently removing trees, selling timber or firewood, trading timber or firewood, selling or trading other solid wood forest products from your project. For further information and assistance please contact the CAL FIRE Resource Management Office in Willits at (707) 459-7440. Additional information is provided with your documents and is available on the CAL FIRE web site at: http://www.fire.ca.gov/rsrc-mgt_forestpractice.php

100' DEFENSIBLE SPACE Make Your Home FIRE SAFE

or

Contact your local CAL FIRE office, fire department,
or Fire Safe Council for tips and assistance.

www.fire.ca.gov

Why 100 Feet?

Following these simple steps can dramatically increase the chance of your home surviving a wildfire!

A **Defensible Space** of 100 feet around your home is required by law.¹ The goal is to protect your home while providing a safe area for firefighters.

1 "Lean, Clean and Green Zone."

– Clearing an area of 30 feet immediately surrounding your home is critical. This area requires the greatest reduction in flammable vegetation.

2 "Reduced Fuel Zone."

– The fuel reduction zone in the remaining 70 feet (or to property line) will depend on the steepness of your property and the vegetation.

Spacing between plants improves the chance of stopping a wildfire before it destroys your home. You have two options in this area:

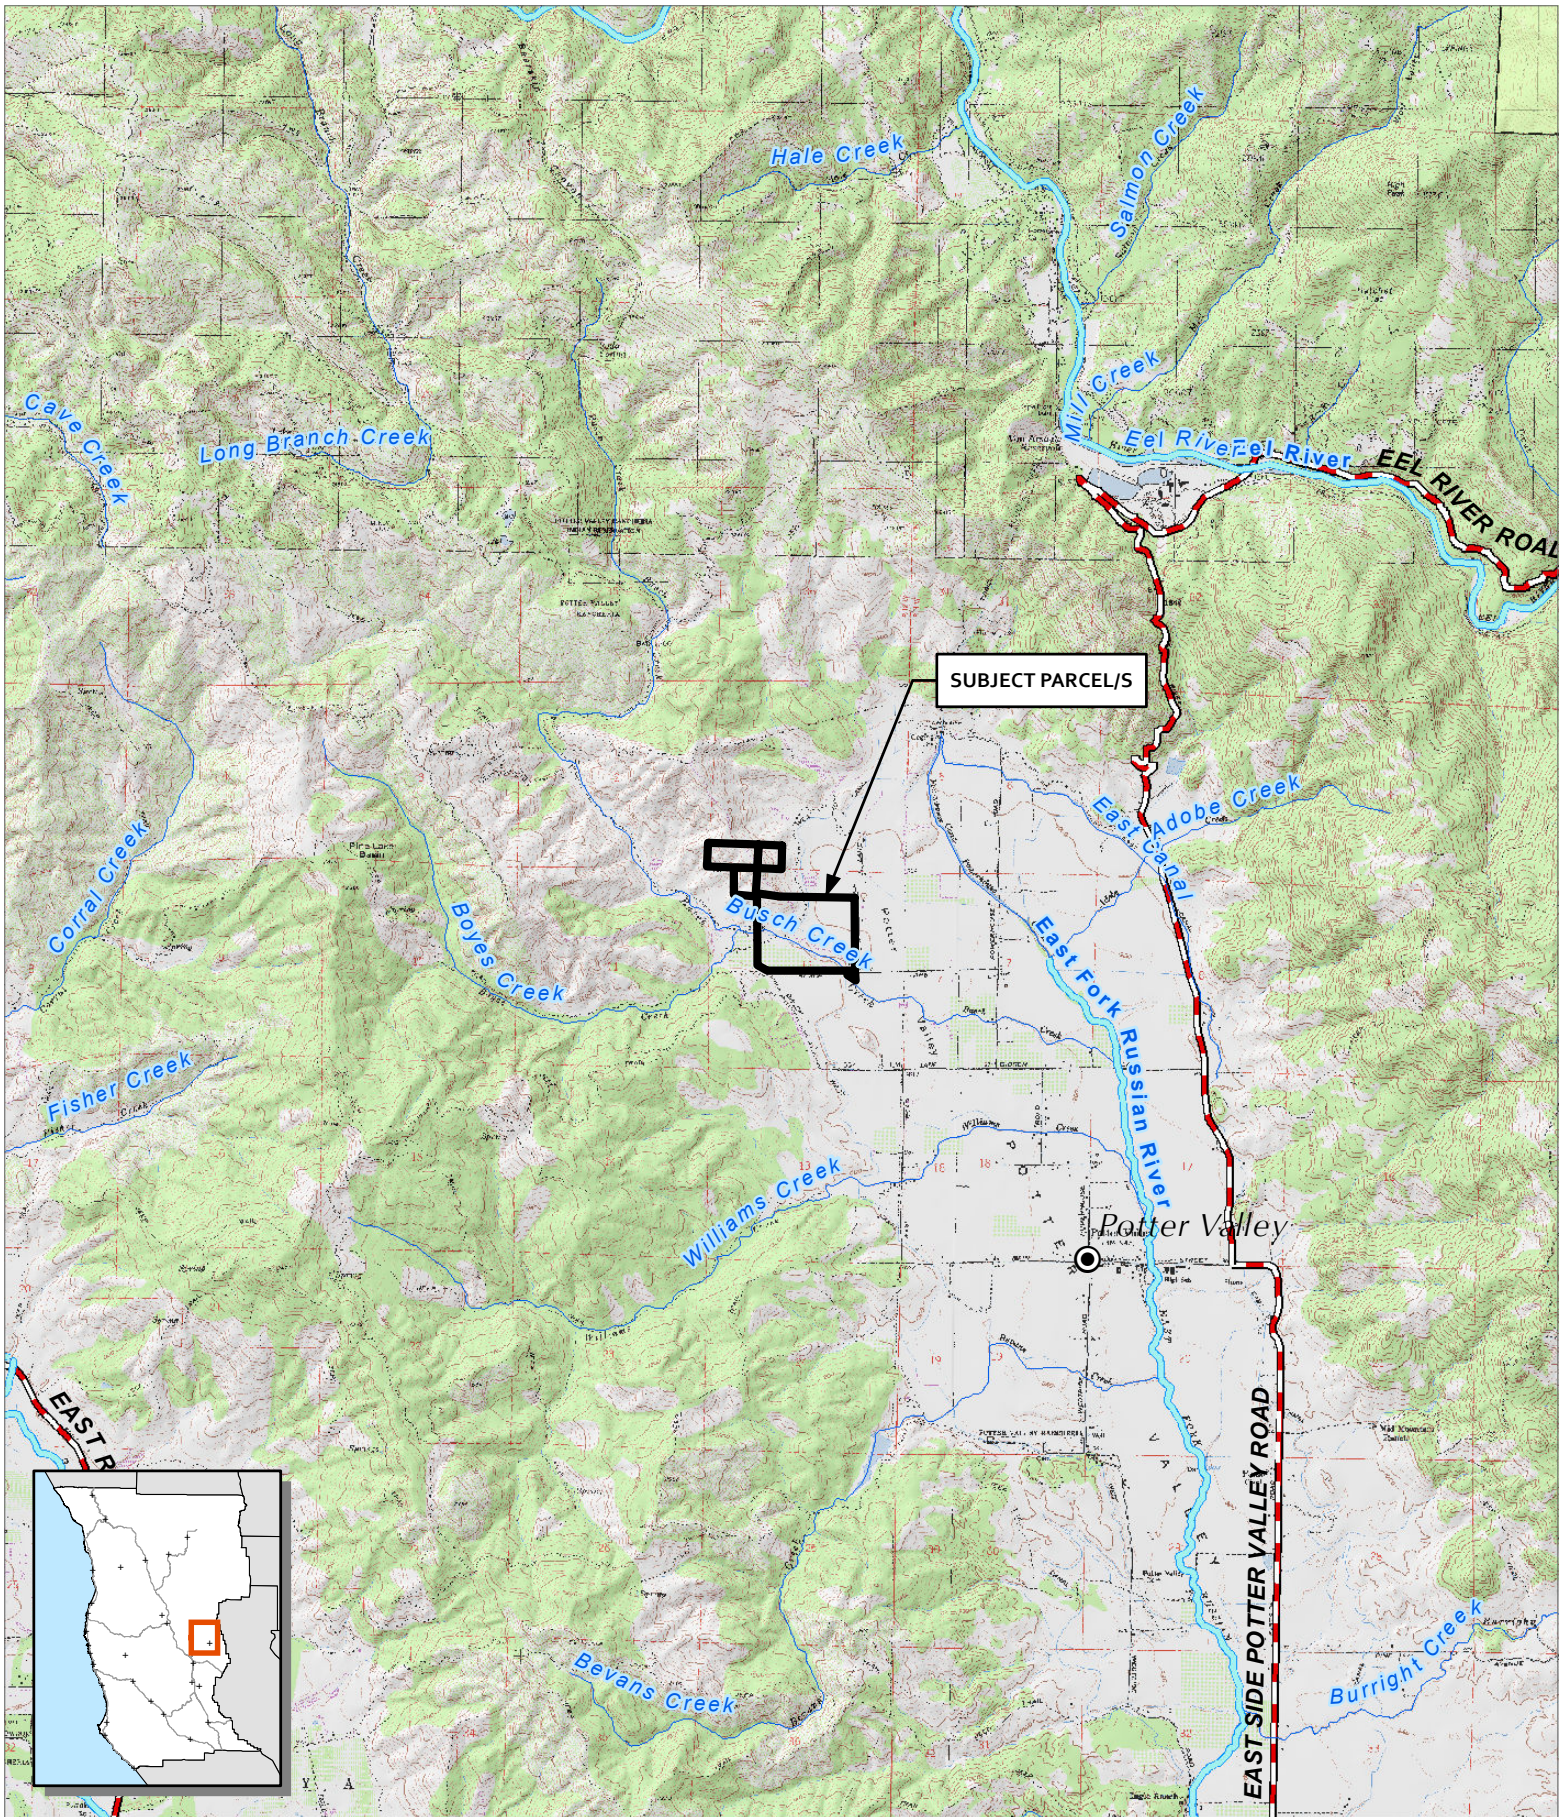

- a Create horizontal and vertical spacing between plants. The amount of space will depend on how steep the slope is and the size of the plants.
- b Large trees do not have to be cut and removed as long as all of the plants beneath them are removed. This eliminates a vertical "fire ladder."

When clearing vegetation, use care when operating equipment such as lawnmowers. One small spark may start a fire; a string trimmer is much safer.

Remove all build-up of needles and leaves from your roof and gutters. Keep tree limbs trimmed at least 10 feet from any chimneys and remove dead limbs that hang over your home or garage. The law also requires a screen over your chimney outlet of not more than 1/2 inch mesh.

1. These regulations affect most of the grass, brush, and timber-covered private lands in the State. Some fire department jurisdictions may have additional requirements. Some activities may require permits for tree removal. Also, some activities may require special procedures for, 1) threatened and endangered species, 2) avoiding erosion, and 3) protection of water quality. Check with local officials if in doubt. Current regulations allow an insurance company to require additional clearance. The area to be treated does not extend beyond your property. The State Board of Forestry and Fire Protection has approved Guidelines to assist you in complying with the new law. Contact your local CAL FIRE office for more details.
