Mendocino County

SEP 07 2021

Planning & Building Services

Just also wanted to ensure clarification for the MHRB meeting on the September 13 for this new built SFR project as to ensure that the screened porch for the porch upstairs overlooking the screened porch and Ukiah Street to the public view is painted wood and not aluminum clad steel or painted steel as it indicates in the elevation drawings that are viewed on line. One page says it is wood and the other says it is painted aluminum metal. Which is it? Too contemporary if it is steel though I absolutely love the look, just not here for historical Mendocino, should be all wood for all windows, doors and any railings as it was in the mid 1800's.
Thanks!
