Brooke,

This is the "Engineer response to CCC," regarding the Noise/STV.

I'll also forward the CCC's response to our proposed Condition of Approval language for the Noise/STV (COA 36)

Thanks!
Amy

Ciro,

Thanks so much for running that down!

I'm sure that when the system is installed, we can perform noise measurements and then enclose anything that may be a noise irritant, if any.

Thank you!

Amy

Hi Amy,

The pump manufacturer got back to me, " We do not have any test data for noise levels/impacts".

Thanks and Best Regards,

Hi Amy and Carina,

There was no data available on the web, but I reached out to my contacts and if anything is obtained in the morning I will forward it right away.

Thanks and Best Regards,

The pumps would be the
loudest impact from normal
operations of the WWTP, since there
are no blowers. These are relatively
small pumps (1 hp or less) and the
noise level is pretty negligible. Ciro is
seeing if he can track down the
decibel level for the pumps, but
typically they don't list on the cut
sheet since they are so low. If the
level is considered too high for the
species, we could put the pumps in
an enclosure to dampen sound
effects.

If Ciro can't find anything today, he
won't be able to contact anyone at
the pump manufacturer to ask until
tomorrow since they are closed for
the day.

I have to sign off, but I will be on the
meeting at 10 am tomorrow.

Thanks,

Carina Chen, PE, LEED AP

Hi Carina,

Coastal Commission is asking about
the **noise levels being generated
by the WWTP, as potential impact
for Sonoma Tree Voles that may
be present in the Forest.**

**Can you please send me
data on noise levels by end
of day today?**

Sorry for late notice.

Copying the rest of your team in
case they can answer as well.

Thanks!
