Subject: Case #: CDP\_2021\_0036. July 14, 2022 Standard Coastal Dev. Permit

We are the owners of APN 119-120-33, Nan Motolinsky and John Wetzler.

We would like to add to our first letter, just submitted. We are aware of the public concerns and that of Mendocino Unified School District concerning the eastern boundary of your proposed 69 tree removal. We are located on the western boundary, and our portion of the Case No. CDP\_2021\_0036 Permit should be considered separately. Our conversations with Dave Campbell from PG&E only focused on the very large Grand Fir that is leaning toward PG&E's main switching tower and facilities. Removal of this hazardous tree can be accomplished without involving the other properties. Please separate the project into applicable sections, so that the clear and present danger of this Grand Fir tree can be abated.

Please advise us whether the July 14th Zoom will occur, and all updates. Thank you.
