GEOLOGY					
<p>3.1-A: Improvements built on the site would be subject to seismic ground shaking, which could cause the failure of those improvements and risk to human health.</p>	<p>3.1-A.1: A final geotechnical report shall be prepared that incorporates the recommendations set forth in the 2005 RGH Report as modified by mitigation measures recommended in this EIR. The project applicant shall design project structures and foundations to withstand expected seismic forces in accordance with the California Building Code as adopted by the County of Mendocino. Since the project site is located within Seismic Zone 4 it is considered potentially seismically active. The County shall not issue building permits until seismic design criteria are reviewed and approved. During construction adherence to design criteria shall be monitored, and a final report issued documenting conformance prior to occupancy.</p>	<p>Project Engineer Project Geotechnical Consultant</p>	<p>Issuance of Building, Grading or Other Permits</p>	<p>Mendocino County Dept. of Planning & Building Services (Planning Dept.)</p>	<p>Planning Dept. Approval of Final Map</p>
<p>3.1-B: Seismically induced ground failure, including liquefaction and densification, would cause improvements to fail and risk to human health.</p>	<p>3.1-B.1: Potentially unstable surface soils shall be remediated by strengthening the soils during site grading. The strengthening will be achieved by excavating the weak soils and replacing them as properly compacted engineered fill. All site grading and foundation construction shall follow the recommendations of the Geotechnical Engineer of record for the project. The process will include excavation of surface soils and placement of all fill soils at a minimum of 90 percent compaction relative to the maximum dry density near the optimum moisture content as determined in accordance with ASTM D 1557.</p>	<p>Project Engineer</p>	<p>Issuance of Building, Grading or Other Permits</p>	<p>Planning Dept.</p>	<p>Planning Dept. 	<p>Site soils will be tested during construction by the Geotechnical Engineer-of-Record or by a Special Inspector to confirm that minimum standards are met. A final report documenting results of fill testing will be submitted to the County of Mendocino Department of Planning and Building Services and will be subject to the review of that department.</p>				
<p>3.1-C: Potentially unstable slopes or underlying soils could cause the failure of improvements and risk to human health.</p>	<p>3.1-C.1: Cut and fill slopes should be designed and constructed as slope gradients of 2h:1v or flatter, unless otherwise approved by the Geotechnical Engineer-of-record in specified areas. The interior slopes of the retention basin should be inclined no steeper than 3h:1v. If steeper slopes are required, retaining walls shall be used. Fill slopes steeper than 2h: 1v will require the use of a Geogrid reinforcing material to increase stability. Fill slopes shall be constructed by over-filling and cutting the slope to final grade. Graded slopes shall be planted with fast-growing, deep-rooted groundcover to reduce sloughing and erosion.</p> <p>Fills placed on terrain sloping at 5h:1v or steeper shall be continually keyed and benched into firm, undisturbed bedrock or firm soil. The benches shall allow space for the placement of select fill of even thickness under settlement sensitive structural elements supported directly on the fill.</p>	<p>Project Engineer</p> <p>Project Geotechnical Consultant</p>	<p>Issuance of Building, Grading or Other Permits</p>	<p>Planning Dept.</p>	<p>Planning Dept.</p> <p>Prior to building construction</p>

	<p>3.6-A.2 The proposed development will require the preparation of a detailed grading and erosion control plan subject to review and approval by the County prior to earth moving activities (Municipal Code section 18.70.060 – Grading Permit Requirements). Grading will be completed in compliance with County standards.</p>	Project Construction Manager	Issuance of Building, Grading or Other Permits	Planning Dept.	Planning Dept. During and at Completion of construction
	<p>3.6-A.3 Dust control rules and regulations as required by the MCAQMD will be adhered to (Rule 1-200, 1-400(a), 1-410, 1-420, 1-430). These regulations minimize fugitive dust particle during construction. Measures imposed by the MCAQMD include, but not limited to:</p> <ul style="list-style-type: none"> ● All visibly dry disturbed soil surfaces shall be watered to minimize fugitive dust. ● Installation of a “stabilized construction entrance/exit” as detailed in the Department of Transportation storm water handbook (TC-1) will be utilized. ● Earth or other material tracked on to neighboring paved roads shall be removed promptly. ● Dust generating activities will be limited during periods of high winds (over 15 mph). ● Access of unauthorized vehicles onto the construction site during non-working hours shall be prevented. 	Project Construction Manager	Issuance of Building, Grading or Other Permits	Planning Dept.	Planning Dept. During and at Completion of construction

Impact	Mitigation Measure	Implemented by	Implemented when	Monitored by	Verified by and date
	<ul style="list-style-type: none"> ● A weekly log shall be kept of fugitive dust control measures that have been implemented. ● Restrict idling of diesel engines on the site to less than 5 minutes. ● All haul trucks transporting soil, sand or other loose materials off-site shall be covered. ● All vehicle speeds on unpaved roads shall be limited to 15 mph. ● Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure title 13, Section 2485 of the California Code of Regulations). Clear signage shall be provided for construction workers at access points. ● All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation. ● Post a publicly visible sign with telephone number for the applicant's representative regarding dust complaints. This person shall respond and take corrective action within 48 hours. The MCAQMD phone number shall
