Dear Ms. Krog:

Thank you for giving me the opportunity to discuss this case. I live about 1/4 mile north of Navarro Ridge Road on Nonella Lane. In fact, I can see the cell tower from my property.

I firmly support the installation of these utility poles. As I wrote in a previous action concerning the installation of the cell tower, it is important to have communications capabilities along the coast. This will enhance emergency response and will also address the ability for stranded travelers to be able to contact either their friends or emergency responders.

Terry Surles
