Mendocino County

JUL 25 2023

Planning & Building Services

To the Department of Planning and Building Services Commission Staff and the Coastal Permit Administrator -

My name is Paul Brumbaum, residing at 33101 Navarro Ridge Road, my home since 1967.

AT&T installed the utility poles in question in brazen disregard for the coastal permitting process pertaining to the Highly Scenic Zone, and for public safety as well (poles installed an unsafe distance from the road, and in some cases in the drainage culvert).

My question is this:

Years ago Pacific Bell undergrounded its phone lines along the same route. Why shouldn't AT&T, one of the best capitalized corporations in the world, do likewise?

It is in AT&T's interest to do this not just as a matter of law, but as a responsible corporate citizen and a good neighbor.

AT&T should do the right thing and underground the line.

Respectfully submitted,
Paul Brumbaum
