The California Health and Safety Code Chapter 4, §116460, requires all water utilities to have an Emergency Notification Plan. This plan is to be implemented whenever the Department of Health Services determines that your water supply fails to meet water quality standards and represents an imminent danger to the health of the water users. The legislation further requires that the notification indicate the nature of the problem with the water supply.

- ◆ As a Small Community Water System, you are required to notify all customers on the water system
- ◆ If an owner or operator of residential property, you must notify all tenants

Please indicate the method(s) of notification you plan to use:

Written handout sheets

Telephone communication

Posting of notice at each site where drinking water is dispensed

Send a letter to each water user

Small Water System Name:

Small Water System Address:

Small Water System ID#:

Person residing in the area to be contacted regarding implementation of the Notification Plan:
