RE: Redemeyer Road Solar Project – Use Permit (No. U_2023-0008)

To whom it may concern,

On behalf of Sonoma Clean Power (SCP), I would like to express our support for local renewable generation projects. Clean energy installations have a major impact on our goals to reduce greenhouse gas emissions and provide economic and workforce benefits to the community.

Assuming the Redemeyer Solar project is approved by the County of Mendocino and is interconnected into the PG&E system, SCP will support the project through our EverGreen program. EverGreen is SCP's 100% local renewable 24x7 energy supply in Sonoma and Mendocino counties. SCP's EverGreen program is the first of its kind for California, being the only program to offer 100% local, renewable power that runs 24x7.

Please don't hesitate to contact me with any questions.

Sincerely,

A handwritten signature in black ink that reads "Geof Syphers".
